AI Job Kit AI Job Search Kit

AI Job Kit: Free AI Job-Search Tools for Job Seekers

AI Job Kit gives job seekers two free browser-only tools plus an optional paid workflow kit. It is built for honest, role-specific application prep, not for inventing credentials or guaranteeing hiring outcomes.

Free browser tools

- Free Job Post Brief Generator: paste a role description and get keywords, proof points, resume prompts, a cover-letter angle, and a 7-day sprint.
- Free Resume Bullet Generator: paste a target role plus real experience notes and get honest, role-fit resume bullet drafts.
- No pasted job-post or experience text is uploaded by these browser tools.

Optional paid kit

The paid AI Job Kit is a one-time \$9 June launch-price digital download. Buyers get a private browser builder, editable resume and cover-letter templates, prompt sequences, follow-up scripts, interview prep worksheets, an Excel application tracker, and the 7-day application sprint checklist.

Responsible-use boundary

AI Job Kit helps organize application materials. It does not guarantee jobs, interviews, callbacks, hiring outcomes, salary increases, or ATS ranking. Users should edit every AI-assisted draft in their own voice and only use claims they can defend in an interview.
